

Aleksander Szymczak, PhD

Microbiome researcher, astrobiology enthusiast, Post-doctoral Researcher in [OMRF](#)

 szymczakaleksander@gmail.com

 LinkedIn  ResearchGate  Github  Download Resume in PDF

Tech stack

Python, R, Data Science

Bash, Powershell

Next-Generation Sequencing

Illumina, Ion Torrent

Microbial & Cell culturing

Linux, macOS, Windows

Education

PhD Studies

Hirszfeld Institute of Immunology and Experimental Therapy, Wroclaw, Poland

10/2018 - 05/2023

"Viral and bacterial components of the human microbiome: profiling in selected gastrointestinal disease states"

- Laboratory of Phage Molecular Biology, Supervisor: Prof. Krystyna Dąbrowska

Master of Science

University of Lodz, Faculty of Biology and Environmental protection, Lodz, Poland

10/2016 - 07/2018

"Application of the next generation sequencing in the analysis of the bactericidal agent's effect on microbiota"

- Department of Molecular Microbiology, Supervisor: Prof. Paweł Stączek

Bachelor of Science

University of Lodz, Faculty of Biology and Environmental protection, Lodz, Poland

10/2013 - 09/2016

"Strategies for bacterial survival in urinary tract infections"

- Department of Bacterial Biology, Supervisor: Prof. Agnieszka Torzewska

Work History

Principal Investigator - K99/R00

Oklahoma Medical Research Foundation

08/2025 - present

Articular Microbiome for Prediction and Potential Therapy of Periprosthetic Joint Infections

Leverage bacterial and viral community data identified to develop phage antimicrobial therapy to reduce PJI risk and test in vitro

- Award number: 1K99AR086336-01

Postdoctoral Researcher

Oklahoma Medical Research Foundation

06/2023 - present

Investigating the role of the microbiome in osteoarthritis, focusing on how microbial communities within human and mouse cartilage change as the disease progresses

Exploring interventions that modify the microbiome to potentially prevent or reduce the severity of osteoarthritis by addressing changes associated with various risk factors

- Matlock Jeffries' Laboratory

Research intern

Oklahoma Medical Research Foundation, BioLAB program administered by Fulbright Comission

06/2022 - 05/2023

Role of autophagy in Sjorgen's syndrome and Systemic Lupus Erythematosus (SLE)

- Christopher J. Lessard's Laboratory
-

Junior Researcher

Genomtec SA, Wroclaw, Poland

10/2020 - 06/2022

BLAST analysis, Loop Mediated Isothermal Amplification (LAMP) and Real Time PCR molecular pathogen tests design and implementation

- Part of the team developing a mobile platform for genetic diagnostics at the point of patient care
-

Research Student Visitor

Stanford University School of Medicine

09/2021 - 10/2021

Paul Bollyky's Laboratory

- Application of RNAseq in bacteriophage research
-

Principal Investigator

PRELUDIUM 16 - National Science Center grant

08/2019 - 06/2022

“Systemic translocation of bacteriophages as a part of human intestine microbiome”

Budget: \$55000 ~ 210 000 PLN

Grant number: 2018/31/N/NZ6/02584

- Illumina metagenomic shotgun sequencing, Real-Time PCR, Isolation of metagenomic DNA, ultracentrifugation
-

Laboratory Assistant

Research and Development Center in Regional Specialist Hospital in Wrocław

09/2019 - 10.2021

16S rRNA sequencing, Ion Torrent system maintenance, COVID-19 protein research

- Operating Ion Torrent PGM and Ion Torrent S5 Next Next-Generation Sequencing systems , library preparation and quantification
-

Intern

Mobility Programme of Undergraduate Students and PhD students - MOST

10.2017 - 09.2018

University of Wrocław

- Two semesters at Faculty of Biological Sciences and Faculty of Biotechnology, University of Wrocław, Poland
-

Laboratory Technician

Łukasiewicz Research Network - PORT Polish Center for Technology Development - Clean Room laboratory

2017 - 2018

Clean Room laboratory

- Maintenance of ppm standards in the air in laboratory as well as microbiological purity in the clean room area

Projects & Accomplishments

🏆 K99/R00 NIAMS grant "Articular Microbiome for Prediction and Potential Therapy of Periprosthetic Joint Infections"

🏆 Laureate of international scholarship - Fulbright Biolab 2022/2023

🏆 Preludium 16 grant "Systemic translocation of bacteriophages as a part of human intestine microbiome"

Publications

📄 Metabolic pathways profiling of aerobiomes in the Earth's lower atmosphere

Scientific Conferences

Specific gut microbiota remodeling after induction of OA via DMM surgery vs. sham surgery

Szymczak A, Miranda C, Hanebutt N, Dyson G, Barrett M, Jeffries MA

American College of Rheumatology Convergence, 2025

OA-associated pain sensitivity is reduced in OA-protected MRL/MpJ mice, partially mediated by the gut microbiome, and transferrable via microbiome transplantation

Dyson G, Barrett M, Hanebutt N, **Szymczak A**, Brawner C, Dube P, Lopez A, Mehta-D'souza P, Jeffries MA

American College of Rheumatology Convergence, 2025

OA protection in African spiny (Acomys) mice is partially mediated by the gut microbiome and is transferrable to wild-type mice via microbiome transplantation

Dyson G, Barrett M, Hanebutt N, **Szymczak A**, Brawner C, Dube P, Mehta-D'souza P, Seifert A, Jeffries MA

American College of Rheumatology Convergence, 2025

Sex differences in knee joint microbial DNA of C57BL/6 mice and the effect of cross-sex microbiome transplantation

Kurra VV, Lopez A, **Szymczak A**, Dyson G, Dube P, Mehta-D'souza P, Jeffries M

American College of Rheumatology Convergence, 2025

OA-associated pain sensitivity is reduced in OA-protected MRL/MpJ mice, partially mediated by the gut microbiome, and transferable via microbiome transplantation

Dyson G, Barrett M, Hanebutt N, **Szymczak A**, Brawner C, Dube P, Lopez A, Mehta-D'souza P, Jeffries MA

American College of Rheumatology Convergence, 2025

Bacteriophage Communities in Osteoarthritis-Associated Microbiomes

Szymczak A, Brawner C, Dyson G, Barrett M, Hanebutt N, Dube P, Mehta-D'souza P, Jeffries M

EMBO | EMBL Symposium: The human microbiome, 2025

From Therapeutic Agents to Disease Drivers: AI-Powered Discovery of Bacteriophage Roles in Osteoarthritis

Szymczak A, Brawner C, Dyson G, Barrett M, Hanebutt N, Dube P, Mehta-D'souza P, Jeffries M

Microbial Dark Matter, 2025

The Phages of Arthritis: The Role of the Virome in Osteoarthritis

Szymczak A

Cartilage Repair Strategies to Alleviate Arthritis Pain (CARE-AP) Collaborative Research Meeting, 2025

Diverse bacteriophage communities in osteoarthritis patients

Szymczak A, Miranda C, Hanebutt N, Dyson G, Barret M, Jeffries M

Evergreen phage meeting, 2025

Preclinical knee OA can be defined by peripheral blood epigenetic patterns

Miranda C, Hanebutt N, Dyson G, Barrett M, **Szymczak A**, Jeffries MA

Orthopaedic Research Surgery Annual Meeting, 2025

Deep immunophenotyping of knee osteoarthritis patients reveals alterations in T-cell, Regulatory-T, and Monocyte subpopulations

Barrett M, Dyson G, Hannebut N, **Szymczak A**, Brawner C, Jeffries MA

Orthopaedic Research Surgery Annual Meeting, 2025

The development of future radiographic knee osteoarthritis can be predicted by peripheral blood epigenetic models

Miranda C, Hanebutt N, Dyson G, Barrett M, **Szymczak A**, Jeffries M

American College of Rheumatology Convergence Annual Meeting, 2024

Deep immunophenotyping of knee osteoarthritis patients reveals alterations in T cell, Treg,

and monocyte subpopulations

Montana B, Dyson G, Hanebutt N, **Szymczak A**, Miranda C, Jeffries M

American College of Rheumatology Convergence Annual Meeting, 2024

Baseline peripheral blood epigenetic age is accelerated among individuals with knee osteoarthritis who experience dual radiographic+pain and radiographic-only progression but not pain-only progression

Szymczak A, Miranda C, Hanebutt N, Dyson G, Barrett M, Arbeeve L, Golightly Y, Nelson A, Jeffries M

OARSI World congress of Osteoarthritis, 2024

The gut microbiome in mice is altered during osteoarthritis development following destabilization of the medial meniscus (DMM) but not following sham surgery

Szymczak A, Miranda C, Hanebutt N, Dyson G, Barrett M, Jeffries M

OARSI World congress of Osteoarthritis, 2024

Preclinical OA can be defined by peripheral blood epigenetic models

Miranda C, Hanebutt N, Dyson G, Barrett M, **Szymczak A**, Jeffries M

OARSI World congress of Osteoarthritis, 2024

Future osteoarthritis development can be predicted by peripheral blood epigenetic machine-learning models up to 96 months in advance

Miranda C, Hanebutt N, Dyson G, Barrett M, **Szymczak A**, Jeffries M

Military Health System Research Symposium (MHSRS) Annual Meeting, 2024

Preclinical OA can be defined by peripheral blood epigenetic models

Miranda M, Hanebutt N, Dyson G, Barrett M, **Szymczak A**, Jeffries M

ACR Convergence, 2024

Evolution of the T4 phage virion is driven by selection pressure from the gastrointestinal tract environment

Majewska J, Miernikiewicz P, **Szymczak A**, Kaźmierczak Z , Dabrowska K

Viruses of Microbes 2022, Abstract book p. 191

Transfer between ecological niches within human body: how gut phageome expands to serum phageome

Szymczak A, Gnus J, Ferenc S, Miernikiewicz P, Majewska J, Gembara K, Strapagiel D, Stączek P, Dąbrowska K

Viruses of Microbes 2022, Abstract book p. 191

Biofilm the 9th Passenger of Nostromo - Targeting amyloids to prevent biofouling in space,

Kuska M, Łopucki K, Okoń R, Pilska-Piotrowska M, Latos K, Kowalczyk A, **Szymczak A**,
Górecki I, Janiec J, Zajkowski T, Rothshild L

Life and Space Conference 2021, Abstract Book p. 52, 29.09 - 1.10 2021

Correlation between SNPs in human genomes and bacterial and viral complexity of human microbiome

Szymczak A, Gembara K, Ferenc S, Strapagiel D, Majewska J, Miernikiewicz P, Lach, J,
Gnus J, Stączek P, Witkiewicz W, Dąbrowska K

EMBL Symposium: New Approaches and Concepts in Microbiology, 7-9.06.2021, Online Abstract Book

Comparison of human stomach microbiome and virome fractions

Szymczak A, Ferenc S, Miernikiewicz P, Majewska J, Gnus J, Witkiewicz W, Dąbrowska K

Oxford Bacteriophage Conference - Phages 2019, 11-12.09.2019, Oxford UK, Book of Web p. 36

Microbiome comparison of *Helicobacter pylori* infected and non-infected patients

Szymczak A, Majewska J, Ferenc S, Miernikiewicz P, Witkiewicz W, Dąbrowska K

8th International Weigl Conference, 26-28.06.2019, Łódź, Abstract Book p. 130

Gut microbiome composition in mice after 100 days of oral treatment with staphylococcal bacteriophage A3R

Szymczak A, Majewska J, Marek-Bukowiec K, Lecion D, Miernikiewicz P, Kęska W, Kołodziej M, Górski A, Dąbrowska K

EMBO Viruses of Microbes 2018, 9-13.07.2018, Wrocław, Abstract Book, p.389 0
